Principal's Message
Dear Spruce Home Public School Families,
Happy New Year! As we step into 2025, I want to take a moment to extend a warm welcome back to all our students, staff, and families. A new year brings new opportunities, fresh goals, and the chance to grow together as a learning community.
At Spruce Home Public School, we take pride in fostering an environment where every student feels valued, supported, and empowered to reach their potential. This year, we remain committed to academic excellence, building meaningful connections, and creating an inclusive space where diversity is celebrated. As we focus on nurturing creativity, critical thinking, and compassion, we aim to equip our students not only for success in the classroom but also for meaningful contributions to the world beyond.
To our students, I encourage you to embrace challenges, celebrate your achievements, and always be kind to yourselves and others. To our parents and guardians, thank you for your ongoing support and partnership in your child's educational journey. And to our dedicated staff, your passion and commitment continue to inspire greatness in our school.
Let's make this year memorable, meaningful, and full of success. Together, we will make 2025 a year to be proud of.

Exciting Opportunity: Prince Albert and North East Regional Science Fair 2025!

Is your child curious about science, technology, or engineering? We are thrilled to invite students to participate in the **Prince Albert and North East Regional Science Fair** on **Thursday, March 27, 2025**, at the Science Centre in Gateway Mall, Prince Albert.

Many parents may think their child can only participate if their entire class is entering – but that's not the case! **Students can enter the fair individually**, and it's a fantastic way to showcase creativity, innovation, and problem-solving skills.

What to Expect: Participating in the Science Fair is a fun and rewarding experience. Students in **grades 5-12** can showcase projects in various categories, such as math, physical science, life science, computers, and engineering. Projects should follow the fair's safety and ethics guidelines, and **students will need to present their project to a panel of judges** who will evaluate their understanding and creativity. It's a great way to learn presentation skills and dive deeper into subjects that fascinate them.

For students in **grades 7-12**, there's an exciting chance to move on to the **Canada-Wide Science Fair** in **Fredericton, New Brunswick**, from **May 31 - June 7, 2025**. While only these grades are eligible for nationals, **all students from grades 5-12 are welcome to join in the regional fun!**

Whether your child is fascinated by math, life sciences, or engineering, there's a place for their ideas at the Science Fair. Let's get creative and have fun with science!

For more information on how to register, contact:

We would like to remind parents, guardians and students about the importance of dressing properly for the weather. Dressing properly allows students to enjoy their recesses. **Please make sure your child is dressed appropriately.**
